

IT Security Policy

Enterprise Knowledge Base – Internal Policy Document

1. Password Security

Employees must use strong passwords for company systems. Passwords must not be shared with other employees or external parties.

2. Two-Factor Authentication

Two-factor authentication (2FA) is required for sensitive systems and applications that contain confidential company information.

3. Suspicious Activity

Employees should report suspicious emails, unauthorized access attempts, or other security concerns to the IT team as soon as possible.

4. Device Security

Company devices must be protected with a password or other approved authentication method. Employees should not leave company devices unattended in publicly accessible locations.
